INDEPENDENT AUDITOR'S REPORT

Board of Trustees Village of Ladd Ladd, Illinois

Opinions

We have audited the accompanying financial statements of the governmental activities, business-type activities, and each major fund of the Village of Ladd, Illinois, as of and for the year ended April 30, 2025, and the related notes to the financial statements, which collectively comprise the Village's basic financial statements as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, and each major fund of the Village of Ladd, Illinois, as of April 30, 2025, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibility for the Audit of the Financial Statements section of our report. We are required to be independent of the Village and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Village's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Village's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Village's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the retirement plan information in Schedule 1, the budgetary comparison information in Schedules 2 and 3, and Notes to Budgetary Comparison Schedules be presented to supplement the basic financial statements, as listed as *Required Supplementary Information* in the table of contents. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Management has omitted the Management Discussion and Analysis that accounting principles generally accepted in the United States of America requires to be presented to supplement the basic financial statements. Such missing information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. Our opinion on the basic financial statements is not affected by this missing information.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Village of Ladd's basic financial statements. Schedules 4, and 5 detailed as Supplementary Information in the table of contents are presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedules identified above as Supplementary Information are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

VILLAGE OF LADD

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES, AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES

Year Ended April 30, 2025

Net Change in Fund Balances - Total Governmental Funds	\$ 49,468
The amount by which capital outlays (\$42,095) exceeded depreciation (\$35,539) in the current period. (Governmental Funds report capital outlays as expenditures and do not report depreciation. In the government-wide statement of activities the cost of the purchased capital assets are reported as depreciation expense over the estimated useful lives of the assets.)	6,556
The amount by which debt service (\$7,047) exceeded interest paid (\$113). (Governmental Funds report debt service interest paid and debt service principal payments as expenditures. In the government-wide statement of activities the cost of the debt service interest paid is reported as Interest on Long-Term Debt as a functional expenditure. Principal paid reduces the long-term	
liability and, in turn, is not recorded as an expenditure.)	6,934
The change in compensated absences that are not due and payable in the current year. (Governmental Funds not report long-term liabilities).	17,914
The change in Net Pension Liability and related Deferred Inflows/Outflows. (Governmental Funds do not report expenditures that do not require current use of financial resources.)	(87,182)
Change in Net Position of Governmental Activities	\$ (6,310)

Note 1 - Summary of Significant Accounting Policies

A. General

The Village of Ladd, Illinois, is operated under the control of a Board of Trustees elected at large by the citizens of the Village. The Board of Trustees monitors all financial transactions of the Village.

For the year ended April 30, 2025, the financial statements are being presented in compliance with Governmental Accounting Standards Board (GASB) Statement No. 34 as described in more detail in Note 1C.

B. Reporting Entity

The Village of Ladd, Illinois, includes all of the funds and account groups relevant to the operation of the Village in the financial statements reported herein.

The criteria of GASB pronouncements have been considered in determining the activities to be included in this report. The Village has determined that no other agency is a component of the Village and the Village is not a component of any other entity.

C. Basis of Accounting

The Village maintains its accounting records on the cash basis in the governmental funds and on the modified accrual basis in the proprietary funds; year-end adjustments are recorded to convert to the accrual basis or modified accrual basis as prescribed by generally accepted accounting principles. In the government-wide financial statements, the accrual basis is used, and revenues are recognized when earned and expenses are recognized when the related liability is incurred. In the governmental fund financial statements, the modified accrual basis is used. Under the modified accrual basis, revenues are recorded when susceptible to accrual, i.e., both measurable and available, except the property tax receivable that is disclosed below. Available means collectible within 60 days. Expenditures are recognized when the related liability is incurred. All revenue and expense accounts are subject to accrual.

Property tax receivable and a balancing deferred inflows of resources are recorded in the government-wide statement of net position and in the fund financial statements for the tax year 2024 property tax levy. These amounts are measurable but not available.

Note 1 - Summary of Significant Accounting Policies (Continued)

D. Basic Financial Statements – Government-Wide Statements

The Village's basic financial statements include both government-wide (reporting the Village as a whole) and fund financial statements (reporting the Village's major funds). For reporting purposes, the Village has elected to treat all funds as major funds. Both the government-wide and fund financial statements categorize primary activities as either governmental or business-type.

In the government-wide Statement of Net Position, both the governmental and business-type activities columns are presented on a consolidated basis by column and are reported on a full accrual, economic resource basis, which recognizes all long-term assets and receivables as well as long-term debt and obligations. The Village's net position is reported in three parts: net investment in capital assets; restricted net position; and unrestricted net position. Fiduciary funds are not included in government-wide statements.

The government-wide Statement of Activities reports both the gross and net cost of each of the Village's functions and business-type activities. The functions are also supported by general government revenues. The Statement of Activities reduces gross expenses by related program revenues and operating and capital grants. Program revenues must be directly associated with the function of business-type activity. Operating grants include operating-specific and discretionary grants while the capital grants column reflects capital-specific grants.

The Village does not allocate indirect costs. The government-wide focus is more on the sustainability of the Village as an entity and the change in its net assets resulting from the current year's activities.

As a general rule the effect of internal activity has been eliminated from the government-wide financial statements.

E. Basic Financial Statements—Fund Financial Statements

The financial transactions of the Village are reported in individual funds in the fund financial statements. Each fund is accounted for by providing a separate set of self-balancing accounts that comprises its assets, liabilities, reserves, fund equity, revenues, and expenditures or expenses. The various funds are reported by generic classifications within the financial statements.

Note 1 - Summary of Significant Accounting Policies (Continued)

E. <u>Basic Financial Statements—Fund Financial Statements</u> (Continued)

1. Governmental Funds:

The focus of the governmental funds' measurement is upon determination of financial position and changes in financial position rather than upon net income. The following is a description of governmental fund types:

- a. General Fund is the general operating fund. It is used to account for all financial resources except those required to be accounted for in another fund.
- b. Special Revenue Funds are used to account for the proceeds of specific revenue sources that are legally restricted to expenditures for specified purposes. The Village has three Special Revenue Funds: the Motor Fuel Tax Fund, the Recreation Fund, and the Working Cash Fund.
- c. Debt Service Funds are used to account for the accumulation of funds for the periodic payment of principal and interest on general long-term debt for governmental funds. The Village has no Debt Service Funds.
- d. Capital Projects Funds are used to account for financial resources to be used for the acquisition or construction of major capital facilities. The Village has no Capital Projects Funds.

2. Proprietary Funds:

Enterprise Funds are used to account for operations that are financed and operated in a manner similar to private business enterprises, where the intent of the governing body is that the costs of providing goods or services to the general public on a continuing basis be financed through user charges. The Village has four Enterprise Funds: the Water Fund (including the Water Debt Service Fund), which accounts for water service to the Village residents; the Sewer Fund (including the Sewer Debt Service Fund), which accounts for sewer service to the Village residents; the Electric Fund, which accounts for electric service to the Village residents; and the Garbage Fund, which accounts for garbage disposal services to the Village residents.

3. Fiduciary Funds:

Fiduciary Funds are used to report assets held in a trustee or agency capacity for others and therefore are not available to support Village programs. The reporting focus is on net assets and changes in net assets. Since by definition these assets are being held for the benefit of a third party and cannot be used to address activities or obligations of the government, these funds are not incorporated into the government-wide statements. The Village has no fiduciary type agency funds.

Note 1 - Summary of Significant Accounting Policies (Continued)

F. Budgets and Budgetary Accounting

Budgetary control is on the total expenditure level for each fund. The governmental fund budgets are on the cash basis and the proprietary funds are budgeted on the modified accrual basis. Budgets are prepared for all funds and all budgets lapse at year-end. The budget was not amended in the current fiscal year. For the current fiscal year, the Appropriation Ordinance served as the budget for expenditures; no budgeting was done for revenues.

The Board of Trustees adopts an appropriation ordinance during the first quarter of the new fiscal year. The appropriation ordinance is the document by which the corporate authorities appropriate such sums of money as are deemed necessary to defray all necessary expenses and liabilities of the Village and specify the objects and purposes for which the appropriations are made and the amount appropriated for each object or purpose.

G. <u>Capital Assets</u>

Capital assets are reported at historical cost or estimated historical cost. Contributed assets are reported at fair market value as of the date received. Additions, improvements, and other capital outlays that significantly extend the useful life of an asset are capitalized. Purchases of capital assets for amounts less than the threshold level are expensed in the year purchased. Other costs, incurred for repairs and maintenance, are expensed as incurred. Depreciation on all assets that exceed the threshold level is provided on the straight-line basis over the following estimated useful lives:

Category	Th	reshold	Life (years)
Buildings	\$	1,000	15-50
Improvements (Other than Buildings)	\$	1,000	5-50
Equipment and Machinery	\$	1,000	3-10

Note 1 - Summary of Significant Accounting Policies (Continued)

G. Capital Assets (Continued)

GASB 34 requires the Village to report and depreciate new infrastructure assets as of May 1, 2004. The infrastructure assets, which include streets and alleys, would likely be the largest asset class of the Village; however, neither their historical cost nor related depreciation was reported in the financial statements prior to May 1, 2004. The recreation is not required, and the Board has elected to report infrastructure only prospectively.

GASB 34 requires the retrospective recognition of capital assets other than infrastructure. The current year's financial statements include that recognition.

The Village has considered possible impairments to its capital assets and asserts that there are none known or anticipated.

H. Revenue and Expenses

Program revenues in government-wide financial statements generally include fees, rental, fines, and other specifically levied revenues. In proprietary funds, operating revenues and expenses are distinguished from non-operating items because they are clearly traceable to the functioning of the specific service provided to the customers.

I. Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

J. Cash and Cash Equivalents

All cash and cash equivalents represent cash on hand, demand deposits, money market accounts, and all certificates of deposits. Deposits in banks or savings associations are valued at cost, which is equivalent to fair value. For purposes of the statement of cash flows, the proprietary funds consider short-term highly liquid investments, including time deposits at financial institutions, to be cash equivalents

Note 1 - Summary of Significant Accounting Policies (Continued)

K. Inventories

Inventories are valued at cost. The only significant inventory is street salt, and the quantity was estimated by the street superintendent.

L. Restricted and Unrestricted Resources

When an expense is incurred in which both restricted/reserved and unrestricted/unreserved net position/fund balances are available, it is the Village's policy to first apply the restricted/reserved resources.

M. Fund Balance Classification

In order to comply with GASB 54, the Village adheres to the fund balance classification requirements. Fund balances in the fund financial statements will now be classified as follows:

- a. Nonspendable Fund balances should be considered to be nonspendable if funds are not in spendable form, or are legally or contractually required to be maintained intact. The Village has nonspendable fund balance in the General Fund for prepaid insurance, \$40,247 and salt inventory, \$12,645.
- b. Restricted Fund balances should be considered to be restricted when constraints placed on funds are either externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments, or imposed by law through constitutional provisions or enabling legislation. The Village has restricted fund balances in the General Fund, see Note 4. Additionally, all fund balances in the Motor Fuel Tax and Playground and Recreation Fund are restricted. Additionally, \$3,001 is restricted for future Village anniversary celebrations and \$1,657 for police purposes.
- c. Committed Fund balances should be considered to be committed if funds can only be used for specific purposes as a result of constraints imposed by formal action of the Village's Board of Trustees. The Village has money committed for the Memorial Fund, \$1,210 and Historical Fund, \$875.
- d. Assigned Fund balances should be considered to be assigned if amounts that are constrained by the Village's intent to be used for specific purposes, but are neither restricted nor committed.
- e. Unassigned Fund balances should be considered to be unassigned if they are a portion of the General fund balances that have not been considered to be restricted, committed, or assigned to specific purposes.

Unless specifically identified, expenditures act to reduce restricted balances first, then committed balances, next assigned balances, and finally act to reduce unassigned balances. Expenditures for a specifically identified purpose will act to reduce the specific classification of fund balance that is identified.

Note 2 - Cash and Investments

Per the Village's investment policy, the Village is allowed to invest in securities as authorized by Sections 2 and 6 of the Public Funds Investment Act (30ILCS 235). Cash accounts are maintained at the North Central Bank in Ladd, Illinois.

		\$ 4,600,908

Note 3 - Capital Assets

The Village's Fixed Assets, excluding land, are valued at historical cost or estimated historical cost, if actual cost is not known. A detailed listing is on file with the Village Clerk. Land was valued at estimated fair market value since no historical records were available. The current year additions were body and a car camera, \$42,095; water equipment, \$39,694; generators, \$43,880; and a Freightliner, \$164,915. There were no current year deletions.

Note 4 - Restricted Fund Balances and Restricted Net Assets

Amounts in the Motor Fuel Tax Fund and Recreation are classified as restricted in the fund financial statements and restricted in the government-wide financial statements.

In the General Fund, special levies were made for audit, insurance, social security, IMRF, ambulance, civil defense, streets & bridges, and police. All special levies in all funds were spent for the stated purposes. Special levies for police protection, garbage, street lighting, community center, and school crossing guards are deposited in the general fund. All property tax money received for these special levies was expended in the year ended April 30, 2025. No restricted fund balance is necessary for these items. Restrictions for levied taxes in the General fund exist for ESDA, insurance, IMRF, social security, audit, and police equipment at April 30, 2025.

	\$	1,352,131

Note 5 - Property Tax

Property taxes are attached as an enforceable lien on property as of January 1. Taxes are collectible in two installments in July and September. The County Collector distributes these taxes to the various entities and funds within 30 days of collection. The Village adopted a Tax Levy Ordinance November 2023. The tax assessment for the Village for 2023 was \$19,054,609. The extension and collections were as follows:

	Rate	Extension	Received	Difference

^{*}Levied through the township.

Note 6 - Interfund Payables/Receivables and Transfers

There were no interfund payables/receivables at April 30, 2025. Interfund receivables and payables are presented in the fund financials but are eliminated in the government-wide statements. The working cash fund transferred \$8,538 to the General Fund for operating expenditures.

Note 7 - Other Receivables and Payables

At April 30, 2025, the following receivables are recorded:

- Accounts Receivable Utility billings and interest earned not yet collected at April 30. Other receivables identified by the Clerk.
- Due From Other Governments Income tax, sales tax, use tax, replacement tax, and motor fuel tax for the current fiscal year but collected after.
- Accrued Wages, Accrued Vacation, and Payroll Tax Liabilities Unpaid wages and the related FICA and Medicare taxes for work performed in the current fiscal year. Accrued vacation paid out to employee upon resignation and board approval.
- Accounts Payable Unpaid bills for materials received or services provided at year end.

Note 8 - Insurance Risk Management

The Village provides for risk management by securing comprehensive insurance through private carriers. The Village Clerk reports no major changes in insurance coverage or risk during the current fiscal year. Insurance premiums are paid through the General Fund. Tort levy funds were expended for the following purposes: insurance premiums of \$58,842 for liability, property, and workmen's compensation.

Note 9 - Risk Management

The Village faces several types of risk. The following is a discussion of the nature of the risks, the significance to the village, and the policies in place to reduce the risk:

- 1) <u>Custodial credit risk</u> for deposits is the risk that in the event of bank failure, the deposits may be in peril. The village policy is to either keep deposit amounts below F.D.I.C. insurance levels at a specific institution or to require the institution pledge securities to insure the deposits in excess of F.D.I.C. levels. The results are disclosed in Note 2. This risk is moderately low.
- 2) <u>Interest rate risk</u> is the risk that interest rate changes may adversely affect the fair value of investments or debt issues. Since the village's investments are all cash or cash equivalents, this risk is minimal. The

Note 9 - Risk Management (Continued)

village's long-term debt accrues at fixed rates; therefore, that interest rate risk is also minimal.

- 3) <u>Concentration of credit risk</u> is the risk of loss attributed to the magnitude of the village's investment in a single issuer. The village does not invest in entities; its investments are strictly certificates of deposit. This risk is minimal.
- 4) Risk of loss of fixed assets is the risk that fire, wind, theft, etc. may reduce or eliminate the value of buildings, property, equipment, and other assets. The village has comprehensive insurance coverage to minimize this risk. During the past three years, settlements have been less than coverage.
- 5) Risks of claims and judgments is the risk that the assets of the village may be impaired due to an employee or officer's actions or failure to act. This risk is minimized by the comprehensive coverage provided by private carriers.

Note 10 - Prepaid Expenses

Prepaid expenses for insurance premiums beyond April 30, 2025 totaled \$40,247.

Note 11 - Leases

The Village does not have leases as of April 30, 2025.

Note 12 - Long-Term Debt

The following is a summary of long-term debt transactions of the Village of Ladd for the year ended April 30, 2025:

	B	eginning of							Du	e Within
Governmental Activities		Year	Debt Issued		Debt Retired		End of Year		One Year

Note 12 - Long-Term Debt (Continued)

1

2020 Squad Car Loan - A loan from North Central Bank was issued in the current fiscal year for the purchase of a new police squad car after the 2019 squad car was totaled. The note is for five years with a 3.25% interest rate with monthly payments of \$642.46. The squad car was paid in full in the current year.

IL EPA Loan – Sewer Fund - A loan from the Illinois Environmental Protection Agency for a sewer separation project began in fiscal year 2013. At April 30, 2014, \$1,867,247 was issued, of which \$466,812 was forgiven by the IL EPA. The loan is expected to be repaid over 20 years starting in September 2013 and ending September 2032 with semi-annual payments of \$40,948 due at 1.25%. The Village collects fees billed to residents for the repayment of the IL EPA Loan in a separate Sewer Reserve Fund and is reported in the Sewer Fund on the financial statements. The cash balance of \$305,092 in the Sewer Reserve Fund is set aside for debt service. The repayment schedule is as follows:

FY Ending	Principal		oal Interest		_	Total
2026	\$	74,821	\$	7,074	\$	81,895
2027		75,759		6,136		81,895
2028		76,709		5,185		81,894
2029		77,671		4,224		81,895
2030		78,645		3,250		81,895
2031-2033		200,955		3,783		204,738
Total	\$	584,560	\$	29,652	\$	614,212

The loan agreements with the Illinois EPA set forth the following reserve requirements that are fully funded as of April 30, 2025:

- a) Bond Interest and Principal—the following year's note payment amount.
- b) Bond Reserve—the minimal annual debt service amount.
- c) Depreciation Reserve—monthly deposits of 1/120 of 10% of aggregate principal amount until it reaches a total of 10% of that amount.

Note 12 - Long-Term Debt (Continued)

IL EPA Loan – Water Fund - A loan from the Illinois Environmental Protection Agency for a water project began in fiscal year 2023. At project end, \$718,717 was issued, of which \$400,000 was forgiven by the IL EPA. The loan is expected to be repaid over 20 years starting in July 2023 with semi-annual payments of \$8,651 due with a .83% interest rate. The Village collects fees billed to residents for the repayment of the IL EPA Loan in a separate Water Reserve Fund and is reported in the Water Fund on the financial statements. The repayment schedule is as follows:

FY Ending	Principal		ncipal Interest		Total	
2026	\$	14,937	\$	2,365	\$	17,302
2027		15,061		2,241		17,302
2028		15,186		2,116		17,302

Note 14 - Retirement Benefits and Other Retirement Benefits Other Than Pensions

The Village has no retirement obligations, other than the IMRF plan mentioned below. All employees are covered by Social Security and Medicare. The Village does pay out employees for accrued vacation and sick pay upon resignation and approval of the board. A liability has been accrued for this.

The Governmental Accounting Standards Board (GASB) issued Statement No. 75, that establishes generally accepted accounting principles for the annual financial statements for postemployment benefit plans other than pension plans. The Village provides continued health insurance coverage at the active employer rate to all eligible employees in accordance with Illinois statutes, which creates an implicit subsidy of retiree health insurance through the Village are required to pay 100% of the current premium. However, no former employee has chosen to stay in the Village's health insurance plan in the last several years. There has been no utilization and, therefore, no implicit subsidy to calculate in accordance with GASB Statement No. 75. The Village has no agreements with former or future employees for which the Village has or will provide an explicit subsidy. The Village has not recorded any postemployment benefit liability as of April 30, 2025.

Note 15 - Pension Plan

Plan Description — The employer's defined benefit pension plan for regular employees provides retirement and disability benefits, post-retirement increases, and death benefits to plan members and beneficiaries. The Employer's plan is managed by the Illinois Municipal Retirement Fund (IMRF), the administrator of a multi-employer public pension fund. A summary of IMRF's pension benefits is provided in the "Benefits Provided" section of this document. Details of all benefits are available from IMRF. Benefit provisions are established by statute and may only be changed by the General Assembly of the State of Illinois. IMRF issues a publicly

Note 15 - Pension Plan (Continued)

available Comprehensive Annual Financial Report that includes financial statements, detailed information about the pension plan's fiduciary net position, and required supplementary information. The report is available for download at www.imrf.org.

Benefits Provided – IMRF has three benefit plans. The vast majority of IMRF members participate in the Regular Plan (RP). The Sheriff's Law Enforcement Personnel (SLEP) plan is for sheriffs, deputy sheriffs, and selected police chiefs. Counties could adopt the Elected County Official (ECO) plan for officials elected prior to August 8, 2011 (the ECO plan was closed to new participants after that date). All three IMRF benefit plans have two tiers. Employees hired before January 1, 2011, are eligible for Tier 1 benefits. Tier 1 employees are vested for pension benefits when they have at least eight years of qualifying service credit. Tier 1 employees who retire at age 55 (at reduced benefits) or after age 60 (at full benefits) with eight years of service are entitled to an annual retirement benefit, payable monthly for life, in an amount equal to 1-2/3% of the final rate of earnings for the first 15 years of service credit, plus 2% for each year of service credit after 15 years to a maximum of 75% of their final rate of earnings. Final rate of earnings is the highest total earnings during any consecutive 48 months within the last 10 years of service, divided by 48. Under Tier 1, the pension is increased by 3% of the original amount on January 1 every year after retirement. Employees hired on or after January 1, 2011, are eligible for Tier 2 benefits. For Tier 2 employees, pension benefits vest after ten years of service. Participating employees who retire at age 62 (at reduced benefits) or after age 67 (at full benefits) with ten years of service are entitled to an annual retirement benefit. payable monthly for life, in an amount equal to 1-2/3% of the final rate of earnings for the first 15 years of service credit, plus 2% for each year of service credit after 15 years to a maximum of 75% of their final rate of earnings. Final rate of earnings is the highest total earnings during any 96 consecutive months within the last 10 years of service, divided by 96. Under Tier 2, the pension is increased on January 1 every year after retirement, upon reaching age 67, by the lesser of: 3% of the original pension amount, or ½ of the increase in the Consumer Price Index of the original pension amount.

Employees Covered by Benefit Terms – As of December 31, 2024, the following employees were covered by the benefit terms:

Number of - Retirees and Beneficiaries 8 - Inactive, Non-Retired Members 3 - Active Members 8

19

Membership

Total

Note 15 - Pension Plan (Continued)

Contributions – As set by statute, the Employer's Regular Plan Members are required to contribute 4.5% of their annual covered salary. The statute requires employers to contribute the amount necessary, in addition to member contributions, to finance the retirement coverage of its own employees. The Employer's annual contribution rate for calendar years 2025 and 2024 were 9.51% and 10.75%, respectively. For the fiscal year ended April 30, 2025, the Employer contributed \$49,884 to the plan. The Employer also contributes for disability benefits, death benefits, and supplemental retirement benefits, all of which are pooled at the IMRF level. Contribution rates for disability and death benefits are set by IMRF's Board of Trustees, while the supplemental retirement benefits rate is set by statute.

Net Pension Liability – The Employer's net pension liability was measured as of December 31, 2024. The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date.

Actuarial Assumptions - The following are the methods and assumptions used to determine total pension liability at December 31, 2024. The actuarial cost method used was Entry Age Normal. The asset valuation method used was Market Value of Assets. The inflation rate was assumed to be 2.25%. Salary increases were expected to be 2.85-13.75%, including inflation. The investment rate of return was assumed to be 7.25%. Projected retirement age was from the Experience-based Table of Rates, specific to the type of eligibility condition, last updated of the 2023 valuation according to an experience study from years 2020-2022. For mortality, for **non-disabled retirees**, the Pub-2010, Amount-Weighted, below-median income, General, Retiree, Male (adjusted 108%) and Female (adjusted 106.4%) tables, and future mortality improvements projected using scale MP-2021. For disabled retirees, the Pub-2010, Amount-Weighted, below-median income, General, and Disabled Retiree, Male and Female (both unadjusted) tables, and future mortality improvements projected using scale MP-2021. For active members, the Pub-2010, Amount-Weighted, below-median income, General, Employee, Male and Female (both unadjusted) tables, and future mortality improvements projected using scale MP-2021. The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense, and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return to the target asset allocation percentage and adding expected inflation.

The target allocation and best estimates of geometric real rates of return for each major asset class are summarized in the following table:

Note 15 - Pension Plan (Continued)

	Portfolio Target	Long-Term Expected
Asset Class	Allocation	Real Rate of Return
Equities	33.5%	19.02%
International Equities	18.0%	6.35%
Fixed Income	24.5%	3.14%
Real Estate	10.5%	2.25%
Alternatives	12.5%	6.72%
Cash Equivalents	1.0%	5.57%
Total	100%	

Single Discount Rate - A Single Discount Rate of 7.25% was used to measure the total pension liability. The projection of cash flow used to determine this Single Discount Rate assumed that the plan members' contributions will be made at the current contribution rate, and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. The Single Discount Rate reflects: (1) the longterm expected rate of return on pension plan investments (during the period in which the fiduciary net position is projected to be sufficient to pay benefits), and (2) the taxexempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating (which is published by the Federal Reserve) as of the measurement date (to the extent that the contributions for use with the long-term expected rate of return are not met). For the purpose of the most recent valuation, the expected rate of return on plan investments is 7.25%, the municipal bond rate is 4.08%, and the resulting single discount rate is 7.25%.

VILLAGE OF LADD REQUIRED SUPPLEMENTARY INFORMATION NOTES TO BUDGETARY COMPARISON SCHEDULES Year Ended April 30, 2025

Note A - Budget to Actual Reconciliation

An explanation of the difference between budgetary basis revenues and expenditures and revenues and expenditures determined in accordance with generally accepted accounting principles follows:

				Major Special
	(General	R	levenue
		Fund		Funds
Budgetary basis revenue (inflow)	\$	905,949	\$	86,706
Differences - budget to GAAP:				
Increase (Decrease) in Accounts Receivable		996		23
Total revenue (GAAP basis) as reported on				
statement of revenues, expenditures, and fund				
balances - governmental funds (Statement 4)	\$	906,945	\$	86,729
Budgetary basis expenditures (outflows)	\$	834,278	\$	112,040
Increase (Decrease) in Payroll Payables		(374)		-
Increase (Decrease) in Accounts Payable		(4,898)		(1,005)
(Increase) Decrease in Inventory		2,055		-
(Increase) Decrease in Prepaids		2,110		
Total expenditures (Statement 4)	\$	833,171	\$	111,035

Note B - Budgetary Process

The Board did not approve an Operating Budget in the current fiscal year. All budgetary comparisons were to the Appropriation Ordinance approved by the Board on July 23, 2024. The budget was not amended and all appropriations lapse at year end. More information is available in Note 1 (F) to the financial statements.

Note C - Expenditures in Excess of Appropriations

Actual expenditures did not exceed appropriations in any fund. Expenditures in excess of appropriations is in violation of state statutes.
